# 4. Key Product Features

Fund Type	Income.			
Fund Category	Sukuk.			
Benchmark	12-months Islamic Fixed Deposit-i rate.  Source: www.maybank2u.com.my			
Investment Strategy	To achieve the Fund's objective, the Fund will invest between 70% - 98% of the Fund's NAV in a portfolio of Ringgit Malaysia denominated sukuk issued and/or offered in Malaysia with a minimum sukuk rating of 'AA-' by RAM or equivalent rating by MARC. However, if any of the sukuk held in the Fund has been downgraded to a rating of "BBB+" or lower by RAM or equivalent rating by MARC, the Manager may choose to dispose the sukuk as soon as practicable. However, if such prompt action may be detrimental to the Fund, the Manager may continue to hold onto the downgraded sukuk for up to 90 days. The Manager will also invest between 2% - 30% of the Fund's NAV in Islamic liquid assets including Islamic money market instruments and placement in Islamic deposits.  **Note: Please refer to section 3.5 in the prospectus for further details.**			
Launch Date	8 January 2014.			
Manager	Maybank Asset Management Sdn Bhd.			
Trustee	TMF Trustees Malaysia Berhad.			
Shariah Adviser	Maybank Islamic Berhad.			
Minimum Initial Investment	RM1,000 or such other lower amount as determined by the Manager from time to time.

<sup>\*</sup> Medium to long-term means a period of 3 years and above.

Note: The Manager's distributors may set a lower minimum initial and/or additional investments than the above for investments made via the distributors subject to their terms and conditions for investment.				
Minimum Units Held	500 Units or such other lower number of Units as determined by the Manager from time to time.			
	Distribution, if any, shall be on an annual basis.			
Distribution of Income	Subject to the provisions of the deed of the Fund, the Fund may distribute from realised income, realised gains and/or capital to enable the Fund to distribute income on a regular basis in accordance with the distribution policy of the Fund. Any declaration and payment of distribution will have the effect of lowering the NAV of the Fund.			
	Distribution out of the Fund's capital has a risk of eroding the capital of the Fund. It may reduce the Fund's capital available for future investment and the Fund's potential for future income generation; it may also cause the NAV of the Fund to fall over time. The greater the risk of capital erosion that exists, the greater the likelihood that, due to capital erosion, the value of future returns would also be diminished.

Between 2% - 30% of the Fund's NAV	Islamic liquid assets including Islamic money market instruments and placement in Islamic deposits

# Key RisksSpecific Risks

## Company specific risk

Specific risks to Shariah-compliant securities issued by a company apply as there are adverse conditions or negative sentiments which a company can be uniquely exposed to, be it from the view of management issues, deteriorating business fundamentals or losing competitiveness. As a consequence, the price of Shariah-compliant securities issued by such company might fall and subsequently affect the Fund's performance. The impact of a specific company may be reduced as the Fund invests in a wide portfolio of investments thereby spreading the element of this risk through diversification.

#### Profit rate risk

This refers to the risk that the investment value of the Fund may generally be reduced due to a rise in future profit rates. Profit rate risk is particularly borne by profit-bearing assets, such as Islamic money market instruments or sukuk. In the event that a sukuk is held till maturity, the profit rate changes will not affect the yields of the sukuk. However, investors should be aware that whether the Fund will hold any sukuk until maturity will depend on actual and expected changes in profit rates.

Profit rates in Islamic money market instruments will fluctuate according to the overnight policy rate determined by Bank Negara Malaysia. On the other hand, sukuk are tradable and therefore, profit rates will be determined by supply and demand for such investments in the trading market. Islamic money market instruments and sukuk prices generally moves inversely with profit rates, the prices will decline when profit rate rises or are expected to rise. The price volatility is normally greater for longer-tenure profit-bearing asset rather than shorter-tenure profit-bearing asset as they are more sensitive to profit rate changes.

The Manager attempts to mitigate the profit rate risk of the Fund by managing the duration structure of the profit-bearing assets according to the Manager's view of the future profit rate trend. When profit rates are expected to increase, the Fund will switch to profit-bearing assets with shorter duration and are less sensitive to profit rate changes.

#### Default Risk

This risk will arise when the issuer of a sukuk fails to make timely payments of the profits and/or principal on the maturity date. Islamic deposits that the Fund has placed with financial institutions are also exposed to default risk. If the issuer or financial institutions become insolvent, the Fund may suffer capital losses with regards to the capital invested and profit foregone, causing the performance of the Fund to be adversely affected.

#### Distribution Out of Capital Risk

The Fund may distribute income out of its capital. The declaration and payment of distribution may have the effect of lowering the NAV of the Fund. In addition, distribution out of the Fund's capital may reduce part of the unit holders' original investment and may also result in reduced future returns to unit holders.

Investors are reminded that the risks listed above may not be exhaustive and if necessary, they should consult their adviser(s), e.g. bankers, lawyers, Shariah advisers, stockbrokers or independent professional advisers for a better understanding of the risks.

For more details, please refer to Chapter 3.6 in the prospectus for the general and specific risks of investing in the Fund.

Note: If your investments are made through an IUTA ("Distributor") which adopts the nominee system of ownership, you would not be deemed to be a Unit Holder under the deed and as a result, your rights as an investor may be limited. Accordingly, we will only recognise the Distributor as a Unit Holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed.
