### KEY RISKS

5. Below are the specific risks associated with the Fund which may cause significant losses if they occur:

<table>
<thead>
<tr>
<th>Risk Description</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Liquidity risk</td>
<td>This refers to the ease with which an investment can be disposed at or near its fair value. As the Fund primarily invests in the beneficial ownership of Real Estate Assets, the Fund is exposed to high liquidity risk as it may not be possible to immediately sell the beneficial ownership of the Real Estate Assets at the prevailing market prices.</td>
</tr>
<tr>
<td>Profit rate risk</td>
<td>Increase in prevailing profit rates will cause the Fund’s investment in money market instruments to decline in value. This loss is however not realised unless the Manager is forced to sell before maturity.</td>
</tr>
<tr>
<td>Counterparty risk</td>
<td>The Sponsor or its affiliates may not honour its contractual obligations under the transaction documents. These include its obligations to pay the lease rental for the Real Estate Assets, to repurchase the units from the Manager pursuant</td>
</tr>
</tbody>
</table>
to a repurchase request by a Unit Holder, and to pay the Exercise Price upon exercise of a purchase undertaking, sale undertaking or substitution undertaking.

**Adequacy of coverage**

The Lease Assets could suffer physical damage caused by fire, flood, earthquake or other causes or the Sponsor may suffer a public liability claim, which may result in losses (including loss of rent), and may not be fully compensated by takaful. In addition, certain types of risks (such as risk of war and terrorist acts) may be uninsurable or the cost of takaful may be prohibitive when compared to the risk. Should an uninsured loss or a loss in excess of insured limits occur, the Sponsor could lose the anticipated future revenue from that Lease Assets. No assurance can be given that material losses in excess of insurance proceeds will not occur in the future.

**Non-registration of the transfer of the Lease Assets**

Since the Fund invests in the beneficial ownership of the Real Estate Assets, the Trustee will not become the registered proprietor of the Real Estate Assets unless the Sponsor defaults in its obligation to purchase the beneficial ownership under the purchase undertaking, sale undertaking or substitution undertaking or upon termination of the Fund. In such events, it will become necessary for the Trustee to dispose of any or all of the Real Estate Assets (and in the case where the Real Estate Asset is held under master title, the Trustee may assign its rights as beneficial owner of the Real Estate Assets) and in order to do so the Trustee must be able to either register in its own name or transfer or assign (as the case may be) such Real Estate Assets to a third party purchaser. As part of the assets purchase agreements, the original title deeds and memorandum of transfers (and in the case where the Real Estate Asset is held under master title, the deed of assignment of such Real Estate Asset) (together with documents necessary to effect transfer) have been deposited with the Trustee to hold in escrow and the Trustee has also been appointed as the attorney of the Sponsor under an irrevocable power of attorney. This would permit the Trustee to effect the transfer or assignment of the relevant Real Estate Assets to itself or the third party purchaser.

**Risks of non-renewals of Lease Agreements**

In the event the lease agreements are not renewed or renewed at a lower rental rate than the present rate, the Fund may lose rental income from the Lease Assets and this may affect the distribution of income to Unit Holders.

**Early redemption risks**

Your investment may be compulsorily redeemed upon the Sponsor exercising its clean-up option and repurchasing all units not held by the Sponsor when the Sponsor holds in excess of 90% of all units in issue for a continuous period of six (6) months or more.

**Shariah non-compliance risk**

There is a risk that a currently held Real Estate Asset will be recategorized as Shariah non-compliant upon review by the panel of Shariah advisers. This may occur in the event that the lease rental derived from the activities which are not in accordance with the Shariah principles. Thus, the Fund will not benefit from any lease rental received from the Lease Asset after the recategorization of the Lease Asset. As a result thereof, the lease rental will be channelled to any charitable bodies as advised by the panel of Shariah advisers.

Note: If your investments are made through an institutional unit trust adviser (“Distributor”) which adopts the nominee system of ownership, you would not be deemed to be a Unit Holder under the deed and as a result, your rights as an investor may be limited. Accordingly, we will only recognize the
Distributor as a Unit Holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed.

**CHARGES AND FEES**

These expenses are deducted from the gross income of the Fund.</td>
</tr>
</tbody>
</table>

The Trustee shall pay all payments incurred by the Sponsor in respect of the services performed in relation to the Lease Assets (known as service charge amount) under the service agency agreement. The service charge amount is also equivalent to the additional payment payable by the Sponsor to the Trustee (known as supplementary rental) under the lease agreement and the service agency agreement. Favourable market conditions resulted in higher return for the Fund as compared to the performance benchmark for the period under review from 1st October 2015 to 30th September 2016.

The previous performance benchmark of the Fund, 12-month General Investment Account-i of Maybank Islamic Berhad is now changed to 12-months Islamic Fixed Deposit-i of Maybank Islamic Berhad and will take effect from the date of the prospectus for the Fund. The performance benchmark has been changed as under the Islamic Financial Services Act 2013, the 12-month General Investment Account-i is no longer considered a deposit product but an investment product now. Since the Fund has been benchmarked against a deposit product, the Manager is of the view that the appropriate performance benchmark should be the 12-months Islamic Fixed Deposit-i, which is considered a deposit product.

11. Portfolio turnover ratio

As the Fund invests in the beneficial ownership of the Lease Assets, the portfolio turnover ratio is not applicable to the Fund.
