MONTHLY COMMENTARY OF TARGET FUND

Performance Review

November was a strong risk-on month as Joe Biden won the US Presidential election while US Congress remains split (pending Georgia's senate run-off race on 5th Jan 21). News of various pharmaceutical firms announcing positive results on COVID-19 vaccines further boosted the rally, despite still high level of COVID-19 infection cases in the US and Europe. S&P 500 returned close to 11% while Brent crude traded near USD 50/bbl. Gold retraced 5.5% as investors turned less risk averse.

UST yields initially traded higher with a steeper curve in first half of November, with 10 year yield reaching 95 bps. Long end yields found some retracement towards month end pending Jan 21's Georgia Senate results (if it results in a tie). USD was broadly weaker with Latin American currencies being the outperformer. Among Asian currencies, AUD, IDR and THB outperformed with appreciation of 3-4% against the greenback.

In Credit, JPM JACI returned 1.27% with IG and HY returning 0.95% and 2.36% respectively as credit spreads tightened. For the Fund, bonds returned 1.60% with Currencies and Hedge another 0.61%.

Outlook and Strategy

We expect 2021 will be a year of Goldilocks for Asian credits and currencies. We are bullish first half of 2021 and cautious on the second half. We prefer High yield over Investment grade as we expect the US Treasury curve to steepen. Sector wise, we like renewable and Chinese properties. We also like selective banks T2 and T1 paper in Thailand. In the High grade space we like India, Middle East and Australia. We like Middle East next year as their bonds still offer 20-30 bps pick up over Asia. With Oil prices set to recover and the expected truce between Qatar and Saudi, it will be positive for the Middle East bonds.

We are very bearish USD for the first half of 2021 and like INR, IDR, THB, SGD and AUD. Most of the Asian countries have high nominal and real yields compared to the developed markets. However except for Indonesia, we prefer short duration bonds as we expect curve to steepen.

The biggest risk next year will be more bond supply due to higher fiscal deficit across the globe and higher inflation. However we will be positioned defensively on duration and will be actively managing the duration through the year with hedges.

The yield of the distributions are calculated based on the total dividend payout/ex-distribution NAV.

Based on the fund's portfolio returns as at 30 November 2020, the Volatility Factor (VF) for this fund is 6.51 and is classified as "Low". (Source: Lipper). "Low" includes funds with VF that are above 3.6635 and less than or equal to 10.375 (source: Lipper). The VF means there is a possibility for the fund in generating an upside return or downside return around this VF. The Volatility Class (VC) is assigned by Lipper based on quintile ranks of VF for qualified funds. VF is subject to monthly revision and VC will be revised every six months. The fund's portfolio may have changed since this date and there is no guarantee that the fund will continue to have the same VF or VC in the future. Presently, only funds launched in the market for at least 36 months will display the VF and its VC.

The term "Maybank AM" used herein refers to Maybank Asset Management. This Fund Fact Sheet ("FFS") is for informational purpose only. You should seek your own financial advice from a licensed adviser before investing in this Fund.
