6. Key Risks

Specific Risks

a) Market Risk

Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the Fund's NAV.

b) Interest Rate Risk

Interest rate risk refers to the impact of interest rate changes on the valuation of bonds. When interest rates rise, bonds prices generally decline and this may lower the market value of the Fund's investment in bonds. The reverse may apply when interest rates fall. In order to mitigate interest rate risk, the Manager will need to manage the bonds taking into account the coupon rate and time to maturity of the bonds.

c) Credit and Default risk

Credit risk relates to the creditworthiness of the issuers of the securities and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the securities. In the case of rated securities, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a security either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the securities. This could adversely affect the value of the Fund.

d) Liquidity Risk

Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.

Investors are reminded that the above list of risks may not be exhaustive and if necessary, they should consult their adviser(s), e.g. bankers, lawyers, stockbrokers or independent professional advisers for a better understanding of the risks.

For more details, please refer to item 6 in the information memorandum for the general and specific risks of investing in the Fund.

Note: If your investments are made through an institutional unit trust adviser ("Distributor") which adopts the nominee system of ownership, you would not be deemed to be a unit holder under the deed and as a result, your rights as an investor may be limited. Accordingly, the Manager will only recognize the Distributor as a unit holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed.
