6. Key Risks

Specific Risks

a) Interest Rate Risk

Interest rate risk refers to the impact of interest rate changes on the valuation of fixed income securities. When interest rates rise, fixed income securities prices generally decline and this may lower the market value of the Fund's investment in fixed income securities. The reverse

may apply when interest rates fall. In order to mitigate interest rate risk, the Manager will need to manage the fixed income securities taking into account the coupon rate and time to maturity of the fixed income securities.

b) Credit and Default risk

Credit risk relates to the creditworthiness of the issuers of the fixed income securities and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income securities. In the case of rated fixed income securities, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income security either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income securities. This could adversely affect the value of the Fund.

c) Country Risk

Investments of the Fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the Fund invests in. For example, the deteriorating economic condition of such countries may adversely affect the value of the investments undertaken by the Fund in those affected countries. This in turn may cause the NAV of the Fund or prices of units to fall.

d) Currency Risk

As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, i.e., RM, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency of the Fund, this will have an adverse effect on the NAV of the Fund in the base currency of the Fund and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.

e) Emerging Markets Risk

The Fund may invest in emerging markets which exhibit lower levels of capital market development when compared to those of developed markets. Given the fast-changing investment landscape of emerging markets, areas such as accounting standards, legal and business environment in emerging markets may be less organised when compared to developed markets, increasing the risks of investing in emerging markets. Generally, investment returns in emerging markets are expected to be more volatile than those in developed markets, resulting in potentially higher investment risk that may affect the Fund's returns. In addition to conducting investment research, such emerging markets risks may be mitigated by diversifying the Fund's exposures across various markets and geographic regions.

f) Concentration Risk

Investors should be aware of the Fund's possible concentration in exposure to a particular sector when investing in this Fund. The Fund will focus a greater portion of its assets in fixed income securities issued by financial institutions, exposing it to concentration risk in the sector of financial institutions. Given that, the Fund's value and/or performance may be heavily dependent on the performance of the financial institutions.

g) Counterparty Risk

Counterparty risk refers to a risk that relates to the credit standing of counterparties when over-the-counter transactions are carried out and is not applicable to transactions performed through exchanges. In the event where the counterparty of a contract fails to meet its contractual obligations, the Fund will suffer from financial losses. The Fund seeks to mitigate this risk through careful selection of counterparties including but not limited to the assessment of the credit strength of the counterparties. Should there be a downgrade in the credit rating of the

OTC derivatives' counterparty, the Manager will evaluate the situation and reassess the creditworthiness of the counterparty. The Manager will take the necessary steps in the best interest of the Fund.

h) Hedging Risk

The Manager will use derivatives to hedge the Fund's portfolio from certain anticipated losses such as those resulting from unfavourable exchange rate and interest rate movements. However, every hedge comes with a cost. In a move to mitigate the risk of uncertainty; the Fund is now exposed to the risk of opportunity loss. Once hedged, the Fund cannot take full advantage of favourable exchange rate and interest rate movements. If the exposure which the Fund is hedging against makes money, the act of hedging would have typically reduced the potential returns of the Fund. On the other hand, if the exposure which the Fund is hedging against loses money, the act of hedging would have reduced the loss, if successfully hedged.

i) Convertible Securities Risk

A convertible security is generally a debt obligation, preferred stock or other security that pays interest or dividends and may be converted by the holder within a specified period of time at a specified conversion price. Investment in convertible securities encompasses risk characteristics of fixed income & options of the underlying (i.e., equity), where its performance may be impacted by (including but not limited to) the performance and volatility of the underlying. Also, certain convertible securities may be embedded with distinctive features i.e., the issuer reserves the right to recall the convertible securities at certain stipulated time. The Manager seeks to mitigate this risk by disposing of the convertible securities which are converted into equities as soon as practicable, i.e. within 90 days from the date of the conversion, subject to market conditions.

Investors are reminded that the above list of risks may not be exhaustive and if necessary, they should consult their adviser(s), e.g. bankers, lawyers, stockbrokers or independent professional advisers for a better understanding of the risks.

For more details, please refer to section 3 in the prospectus for the general and specific risks of investing in the Fund.

Note: If your investments are made through an institutional unit trust adviser ("Distributor") which adopts the nominee system of ownership, you would not be deemed to be a unit holder under the deed and as a result, your rights as an investor may be limited. Accordingly, the Manager will only recognise the Distributor as a unit holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed.

7. Valuation of Investment

The Fund is valued once every business day after the close of the market in which the portfolio of the Fund is invested for the relevant day but not later than the end of the next business day.

As such, the daily price of the Fund for a particular business day will not be published on the next business day but will instead be published 2 business days later (i.e., the price will be 2 days old).

Investors will be able to obtain the unit price of the Fund from www.maybank-am.com.my. Alternatively, the Manager's client servicing personnel can be contacted at 03-2297 7888.

8. Exiting from Investment

Submission of Redemption Request	The cut-off time for redemption of units shall be at 4.00 p.m. on a business day. <i>Note:</i>
----------------------------------	--

	<i>The Manager's distributors may have an earlier cut-off time for receiving redemption request/application. Please check with the respective distributors for their respective cut-off time.</i>
Payment of Redemption Proceeds	Redemption proceeds will be paid within ten (10) calendar days from the Manager's receipt of a redemption request before the cut-off time of 4.00 p.m. on a business day.
Remittance of Redemption Proceeds	The Manager shall remit the redemption proceeds to the bank account held in the name of the unit holder(s).

9. Fund Performance

Average total return of the Fund for the financial year ended 31 May
