4. Basis of calculation made in calculating the returns:

The performance figures are a comparison of the growth/decline in NAV after taking into account all the distributions payable (if any) during the stipulated period.

An illustration of the above would be as follows:

Capital return	=	(NAV per unit end / NAV per unit begin) - 1
Income return	=	Income distribution per unit / NAV per unit ex-date
Total return	=	(1+Capital return) x (1+Income return) - 1

C. Market Review

For the period under review, in August & September 2020, we saw the peak of the rubber glove sector and towards the end of 2020, a shift of focus went into the recovery stocks as successful development of vaccine of Coronavirus disease ("COVID-19") began to surface.

In December 2020 and into January 2021, the technology sector saw increasing momentum as global demands for semiconductor related products and services increased.

D. Market Outlook

We expect business activities to slowly normalize on the back of the vaccine rollout. We expect to see choppy markets as the political instability is still present and the strong retail investor participation will see volatility remaining.

Strategy employed for the period under review, we shifted our focus from the healthcare sector to technology and cyclical sectors. We still see upside on the technology sector going ahead.

E. Investment Strategy

Going forward, in terms of strategy, we maintain our preference for technology but we trim some position to be prudent. We also like recovery stories of industrial demands as well as some selective construction sectors.

All dealings with brokers are executed on best available terms.

During the financial period under review, the Manager and its delegates did not receive any rebates from the brokers or dealers but have retained soft commissions in the form of goods and services such as research materials and advisory services that assist in decision making process relating to the investment of the Fund (i.e. research materials, data and quotation services, computer hardware and software incidental to the investment management of the Fund and investment advisory services) which were of demonstrable benefits to the unitholders.

(formerly known as MAYBANK SMALLCAP TRUST FUND)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

2.4 Financial assets

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the market place. All recognised financial assets are subsequently measured in their entirety at amortised cost or fair value, depending on the classification of the assets.

(i) Financial assets at amortised cost

Unless designated as at FVTPL on initial recognition, debt instruments that meet the following conditions are subsequently measured at amortised cost less impairment loss:

- the assets are held within a business model whose objectives is to hold assets in order to collect contractual cash flows; and
- the contractual terms of the instrument give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

The Fund classifies cash and cash equivalents, interest receivable, dividend receivable and amount due from brokers and amount due from Manager as loan and receivables, and are subsequently measured at amortised cost. Quoted equities is classified as FVTPL.

(ii) Financial assets at FVTPL

Investments in quoted equities are classified as FVTPL, unless the Fund designates an investment that is not held for trading as FVTOCI on initial recognition.

A financial asset is recognised at FVTPL if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of the portfolio of identified financial instruments that the Fund manages together and has evidence of a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument or a financial guarantee.

Debt instruments that do not meet the amortised cost criteria are measured at FVTPL. In addition, debt instruments that meet the amortised cost criteria but are designated as at FVTPL are measured at FVTPL. A debt instrument may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognising the gains and losses on them on different bases.

(formerly known as MAYBANK SMALLCAP TRUST FUND)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

2.4 Financial assets (cont'd)

(ii) Financial assets at FVTPL

Debt instruments are reclassified from amortised cost to FVTPL when the business model is changed such that the amortised cost criteria are no longer met. Reclassification of debt instruments that are designated as at FVTPL on initial recognition is not allowed.

Financial assets at FVTPL are measured at fair value at the end of each reporting year, with any gains or losses arising on remeasurement recognised in profit or loss.

Interest income on debt instruments as at FVTPL is disclosed separately in the profit or loss.

Dividend income on investments in equity instruments at FVTPL is recognised when the Fund's right to receive the dividends is established in accordance with MFRS 9 and is disclosed separately in the profit or loss.

(iii) Impairment of financial assets

Credit losses are recognised based on the 'Expected Credit Loss' ("ECL") model. The Fund recognises loss allowances for ECL on financial instruments that are not measured at FVTPL (financial assets that are debt instruments). The impairment model does not apply to equity investments.

ECL are a probability-weighted estimate of credit losses. They are measured as follows:

- Financial assets that are not credit-impaired at the reporting date:
As the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Fund expects to receive);
- Financial assets that are credit-impaired at the reporting date:
As the difference between the gross carrying amount and the present value of estimated future cash flows.

At each reporting date, the Fund assesses whether financial assets carried at amortised cost are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- Significant financial difficulty of the issuer or counterparty;
- Significant downgrade in credit rating of the instrument by a rating agency;
- A breach of contract such as a default or past due event; or
- The disappearance of an active market for a security because of financial difficulties.

For balances with short-term nature (e.g. interest receivable), full impairment will be recognised on uncollected balances after the grace period.

(formerly known as MAYBANK SMALLCAP TRUST FUND)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

2.4 Financial assets (cont'd)

(iv) Derecognition of financial assets

The Fund derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity.

If the Fund neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Fund recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Fund retains substantially all the risks and rewards of ownership of a transferred financial asset, the Fund continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of financial asset classified as FVTPL, the cumulative unrealised gain or loss previously recognised is transferred to realised gain or loss on disposal in profit or loss.

On derecognition of financial assets at amortised cost, gains and losses are recognised in profit or loss when the asset is derecognised, modified, or impaired.

2.5 Financial liabilities

(i) Classification

Financial liabilities are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability. The Fund classifies amount due to Manager, amount due to Trustee, amount due to brokers, and other payables and accruals as other financial liabilities.

(ii) Recognition and measurement

The Fund's financial liabilities are recognised initially at fair value plus directly attributable transaction costs and subsequently measured at amortised cost using the effective interest rate ("EIR") method. The EIR is a method of calculating the amortised cost of the financial liability and of allocating and recognising the profit expense in profit or loss over the relevant period.

(iii) Derecognition of financial liabilities

The Fund derecognises financial liabilities when, and only when, the Fund's obligations are discharged, cancelled or expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognised in profit or loss.

MAYBANK MALAYSIA SMALLCAP FUND
(formerly known as MAYBANK SMALLCAP TRUST FUND)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

2.6 Unitholders' capital

The unitholders' contributions to the Fund meet the criteria to be classified as equity instruments under MFRS 132 *Financial Instruments: Presentation*. Those criteria include:

- the units entitle the holder to a proportionate share of the Fund's NAV;
- the units are the most subordinated class and class features are identical;
- there is no contractual obligations to deliver cash or another financial asset other than the obligation on the Fund to repurchase; and
- the total expected cash flows from the units over its life are based substantially on the profit or loss of the Fund.

The outstanding units are carried at the redemption amount that is payable at each financial period if unitholder exercises the right to put the unit back to the Fund. Units are created and cancelled at prices based on the Fund's NAV per unit at the time of creation or cancellation. The Fund's NAV per unit is calculated by dividing the net assets attributable to unitholders with the total number of outstanding units.

Distribution equalisation represents the average distributable amount included in the creation and cancellation prices of units. The amount is either refunded to unitholders by way of distribution and/or adjusted accordingly when units are cancelled.

2.7 Revenue / Income

Revenue is measured at the fair value of consideration received or receivable:

- Dividend income from unquoted fixed income securities and deposits with licensed financial institutions are recognised on the accruals basis using the effective interest rate method.
- Realised gain or loss on disposal of unquoted fixed income securities is accounted for as the difference between the net disposal proceeds and the carrying amount of the investments, determined on cost adjusted for accretion of discount or amortisation of premium.
- Redemption fee income is charged to unitholders on cancellation of units before the maturity date and is recognised upon cancellation of units.
- Other income is generally recognised when the Fund satisfies a performance obligation by transferring a promised good or service or an Asset to a customer. An Asset is transferred when (or as) the customer obtains control of that asset.

2.8 Cash and cash equivalents

Cash and cash equivalents include cash at bank and deposits with licensed financial institutions with maturities of 3 months or less, which have an insignificant risk of changes in value.

MAYBANK MALAYSIA SMALLCAP FUND
(formerly known as MAYBANK SMALLCAP TRUST FUND)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

2.9 Distribution

Any distribution to the Fund's unitholders is accounted for as a deduction from realised reserves except where distribution is sourced out of distribution equalisation which is accounted for as a deduction to the unitholders' capital. A proposed distribution is recognised as a liability in the year in which it is approved.

Distribution is either reinvested or paid in cash to the unitholders on the income payment date. Reinvestment is based on the NAV per unit on the income payment date, which is also the time of creation.

2.10 Income tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

Current taxes are recognised in profit or loss except to the extent that the tax relates to items recognised outside profit or loss, either in other comprehensive income or directly in equity.

Current tax expense is determined according to Malaysian tax laws at the current rate based upon the taxable income earned during the financial period.

No deferred tax is recognised as there are no material temporary differences.

2.11 Fair value measurement

The Fund measures its investments at FVTPL at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to by the Fund.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

All assets for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

MAYBANK MALAYSIA SMALLCAP FUND
(formerly known as MAYBANK SMALLCAP TRUST FUND)

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONT'D)

2.11 Fair value measurement (cont'd)

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets that are recognised in the financial statements on a recurring basis, the Fund determines whether transfers have occurred between Levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting year.

2.12 Functional and presentation currency

The financial statements of the Fund are measured using the currency of the primary economic environment in which the Fund operates (the "functional currency"). The financial statements are presented in Ringgit Malaysia ("RM"), which is also the Fund's functional currency.

2.13 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting used by the chief operating decision-maker. The chief operating decision-maker is responsible for the allocating resources and assessing performance of the operating segments.

2.14 Critical accounting estimates and judgements

The preparation of the Fund's financial statements requires the Manager to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of the asset or liability in the future.

No major judgements have been made by the Manager in applying the Fund's accounting policies. There are no key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period.

3. MANAGER'S FEE

The Manager's fee is computed daily based on 1.50% (01.08.2019 to 31.01.2020: 1.50%) per annum ("p.a.") of the NAV of the Fund, before deducting Manager's fee and Trustee's fee for the day.

MAYBANK MALAYSIA SMALLCAP FUND
(formerly known as MAYBANK SMALLCAP TRUST FUND)

4. TRUSTEE'S FEE

The Trustee fee is calculated and accrued daily. The Trustee fee is computed based on 0.07% (01.08.2019 to 31.01.2020: 0.07%) p.a. of the NAV of the Fund, before deducting Manager's fee and Trustee's fee for the day, subject to a minimum of RM 18,000 p.a.

5. TAXATION

	01.08.2020 to 31.01.2021 RM	01.08.2019 to 31.01.2020 RM
Tax charge for the financial period:		
Current income tax expense	<u>11,208</u>	<u>6,502</u>

Income tax is calculated at the Malaysian statutory rate of 24% (01.08.2019 to 31.01.2020: 24%) of the estimated assessable income for the financial period.

The tax expense for the financial period is in relation to the taxable income earned by the Fund after deducting tax allowable expenses. In accordance with Schedule 6 of the Income Tax Act 1967, interest income and dividend income earned by the Fund is exempted from tax.

A reconciliation of income tax expense applicable to net income/(loss) before taxation at the statutory income tax rate to income tax expense at the effective income tax rate of the Fund is as follows:

	01.08.2020 to 31.01.2021 RM	01.08.2019 to 31.01.2020 RM
Net income/(loss) before taxation	<u>33,353,168</u>	<u>8,324,189</u>
