## 6. Key Risks

### Specific Risks of the Fund

#### Profit Rate Risk

Profit rate risk refers to the impact of profit rate changes on the valuation of sukuk, Islamic money market instruments and Islamic deposits. When profit rates rise, sukuk' and Islamic money market instruments' prices generally decline and this may lower the market value of the Fund's investment in sukuk and Islamic money market instruments. The reverse may apply when profit rates fall.

Profit rate fluctuations also affect the Islamic deposits' returns of the Fund. Profit rates offered by the financial institutions will fluctuate according to the overnight rate policy determined by Bank Negara Malaysia and this has direct correlation with the Fund's investment in Islamic deposits. The Fund's future reinvestment in Islamic deposits will benefit from the higher profit rate and in the event of falling profit rates, the Fund's future investment in Islamic deposits will be reinvested at lower profit rates which in turn will reduce the Fund's potential returns.

#### Counterparty Risk

When the Fund conducts over-the-counter (OTC) transactions, it may be exposed to risks relating to the credit standing of its counterparties and their ability to fulfil the conditions of the contracts it enters into with them. Hence, it is generally not applicable to transactions performed through exchanges. This risk is mitigated by performing fundamental credit research and analysis to determine the creditworthiness of the counterparty, and imposing an exposure limit as a precautionary step to limit any loss that may arise directly or indirectly as a result of a defaulted transactions.

#### Credit and Default Risk

Credit risk relates to the creditworthiness of the issuers of the sukuk or Islamic money market instruments, and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the sukuk or Islamic money market instruments. In the case of rated sukuk or Islamic money market instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of sukuk or Islamic money market instrument either defaulting on payments or failing to make

payments in a timely manner which will in turn adversely affect the value of the sukuk or Islamic money market instruments. This could adversely affect the value of the Fund.

This risk is mitigated by investing in sukuk and Islamic money market instruments with credit rating of at least A<sub>3</sub> and P<sub>2</sub> by RAM or an equivalent rating by MARC or other reputable rating agencies, ensuring portfolio diversification for the Fund and carrying out due diligence in the credit assessments of the investments. In the absence of a credit rating for the sukuk and Islamic money market instruments, the credit rating of the issuer issuing the sukuk and Islamic money market instruments will be used instead.

Islamic deposits that the Fund has placed with financial institutions are also exposed to default risk. If the financial institutions become insolvent, the Fund may suffer capital losses with regards to the capital invested and profit foregone, causing the performance of the Fund to be adversely affected. Placements of Islamic deposits with financial institution will also be made based on prudent selection.

#### Shariah Non-compliance Risk

This is the risk of the Fund not conforming to the Shariah Investment Guidelines. The Manager and the EIM would be responsible for ensuring that the Fund is managed and administered in accordance with the Shariah Investment Guidelines. As the Fund can only invest in Islamic instruments, non-compliance may adversely affect the NAV of the Fund when the rectification of such non-compliance results in losses.

***Investors are reminded that the risks listed above may not be exhaustive and if necessary, they should consult their adviser(s), e.g. bankers, lawyers, Shariah advisers, stockbrokers or independent professional advisers for a better understanding of the risks.***

***For more details, please refer to section 3 in the prospectus for the general and specific risks of investing in the Fund.***

***Note: If your investments are made through an institutional unit trust scheme adviser (“Distributor”) which adopts the nominee system of ownership, you would not be deemed to be a unit holder under the deed and as a result, your rights as an investor may be limited. Accordingly, the Manager will only recognize the Distributor as a unit holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed.***

## 7. Valuation of Investment
