6. Key Risks

Specific Risks of the Fund

Equity specific risk

Prices of a particular equity may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such equity will adversely affect the Fund's NAV. However, this impact is mitigated through careful selection of equities through analysis of its fundamental background, portfolio diversification as well as site visits.

Credit and default risk

Credit risk relates to the creditworthiness of the issuers of the sukuk or Islamic money market instruments and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the sukuk or Islamic money market instrument. In the case of rated sukuk or issuers of Islamic money market instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a sukuk or Islamic money market instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the sukuk or Islamic money market instruments. This could adversely affect the value of the Fund.

The risk is mitigated by investing in sukuk and Islamic money market instruments with credit ratings of at least A3 or P2 by RAM Rating Services Berhad or equivalent ratings by other rating agencies or investments that are bank or government guaranteed or secured against assets. In the absence of a credit rating for the sukuk and Islamic money market instruments, the credit rating of the issuer issuing the sukuk and Islamic money market instruments will be used instead.

Profit rate risk

Profit rate risk refers to the impact of profit rate changes on the valuation of sukuk and Islamic money market instruments. When profit rates rise, sukuk and Islamic money market instrument's prices generally decline and this may lower the market value of the Fund's investment in sukuk and Islamic money market instruments. The reverse may apply when profit rates fall. In order to mitigate profit rate risk, the external investment manager will need to manage the sukuk and Islamic money market instruments portfolio by taking into account the profit rate and time to maturity of the sukuk and Islamic money market instruments.

Shariah non-compliance risk

This is the risk of the Fund not conforming to Shariah Investment Guidelines. The Manager and EIM would be responsible for ensuring that the Fund is managed and administered in accordance with Shariah Investment Guidelines. Note that as the Fund can only invest in Shariah-compliant instruments, non-compliance may adversely affect the NAV of the Fund when the rectification of non-compliance results in losses.

Islamic derivatives risk

Islamic derivatives, if any, will only be used for the purpose of hedging the Fund's portfolio from certain anticipated losses such as those resulting from unfavourable exchange rate movements. However, every hedge comes with a cost. In a move to mitigate the risk of uncertainty, the Fund is now exposed to the risk of opportunity loss. Once hedged, the Fund cannot take full advantage of favourable exchange rate movements. If the exposure which the Fund is hedging against makes money, the act of hedging would have typically reduced the potential returns of the Fund. On the other hand, if the exposure which the Fund is hedging against losses money, the act of hedging would have reduced the loss, if successfully hedged.

Counterparty risk

Counterparty risk refers to a risk that relates to the credit standing of counterparties when over-the-counter transactions are carried out and is generally not applicable to transactions performed through exchanges. In the event where counterparties of a contract fail to live up to its contractual obligations, the Fund will suffer from financial losses. The Fund seeks to reduce this risk by performing fundamental credit research and analysis to determine the creditworthiness of the counterparties, prior to commencement of the investment.

Should there be a downgrade in the credit rating of the over-the-counter Islamic derivatives' counterparty, the Manager will evaluate the situation and reassess the creditworthiness of the counterparty. The Manager will take the necessary steps in the best interest of the Fund.

Islamic structured products risk

The NAV of the Fund will be impacted by the valuation of the Islamic structured products that the Fund may invest in from time to time. Factors that may impact the valuation of the Islamic structured products include, but are not limited to the prevailing market price and volatility of the underlying reference asset(s), interest rate levels, time to maturity, foreign exchange rates, increased cost of hedging and/or associated unwinding costs in the event of an early redemption. Any change in the aforesaid factors would either positively or negatively impact the valuation of the Islamic structured products hence affecting the NAV of the Fund. As such, the Fund's NAV will be exposed to potential price volatility, which will be dependent on the valuation of the Islamic structured products that the Fund invested in. To mitigate Islamic structured products risk, the investment of the Fund in Islamic structured products will not exceed 10% of the Fund's NAV.

Investors are reminded that the risks listed above may not be exhaustive and if necessary, they should consult their adviser(s), e.g. bankers, lawyers, Shariah advisers, stockbrokers or independent professional advisers for a better understanding of the risks.

For more details, please refer to section 3.5 in the master prospectus (Shariah funds) for the general and specific risks of investing in the Fund.

Note: If your investments are made through an institutional unit trust scheme adviser ("Distributor") which adopts the nominee system of ownership, you would not be deemed to be a unit holder under the deed and as a result, your rights as an investor may be limited. Accordingly, the Manager will only recognize the Distributor as a unit holder of the Fund and the Distributor shall be entitled to all the rights conferred to it under the deed.

7. Valuation of Investment

The Fund is valued once at the end of each business day. The daily price of the Fund for a particular business day will be published on the next day.

Investors will be able to obtain the unit price of the Fund from www.maybank-am.com.my. Alternatively, the Manager's client servicing personnel can be contacted at 03-2297 7888.

8. Exiting from Investment

Submission of Repurchase Request	The cut-off time for repurchase of units shall be at 4.00 p.m. on a business day. <i>Note: The Manager's distributors may set an earlier cut-off time for receiving applications in respect of any dealing in units. Please check with the respective distributors for their respective cut-off time.</i>
Payment of Repurchase Proceeds	Repurchase proceeds will be paid out within seven (7) business days from the date the repurchase request is received by the Manager.
Remittance of Repurchase Proceeds	The Manager shall remit the repurchase proceeds to the account held in the name of the unit holder(s).

9. Fund Performance
Average total return of MMBI for the financial year ended 30 November

	1- Year	3- Year	5- Year	10- Year
MMBI (%)	(3.92)	0.87	0.36	2.30
Benchmark (%)	(3.85)	0.20	(0.19)	1.51

The average total return of the Fund is based on the following calculation:

$$\text{Performance return} = \frac{\text{NAV } t - \text{NAV } t-1}{\text{NAV } t-1}$$

$$\text{Annualised performance return} = (1 + \text{performance return})^{\left(\frac{\text{number of period per year}}{\text{total no. of periods}}\right)} - 1$$

NAV t refers to NAV at the end of the period.
NAV t-1 refers to NAV at the beginning of the period.

Annual total return for the financial years ended 30 November

	2022	2021	2020	2019	2018	2017	2016	2015	2014	2013
MMBI (%)	(3.92)	(3.57)	10.77	5.20	(5.69)	4.60	0.64	(1.59)	6.48	11.76
Benchmark (%)	(3.85)	(2.70)	7.52	1.70	(3.19)	5.94	(1.85)	(1.57)	2.57	11.31

The total return of the Fund is based on the following calculation:

$$\text{Capital return} = \frac{\text{NAV per unit at the end of the period}}{\text{NAV per unit at the beginning of the period}} - 1$$

$$\text{Income return} = \frac{\text{Income distribution per unit}}{\text{NAV per unit on ex-date}}$$

$$\text{Total return} = (1 + \text{Capital return}) \times (1 + \text{Income return}) - 1$$

1-Year Fund performance review

The Fund registered a total return of -3.92% against its benchmark's return of -3.85%, thus underperformed the benchmark by 0.07%.

The benchmark was changed on 17 September 2017 from 50% of the FBM EMAS Shariah Index and 50% of the 12-month GIA rates of commercial banks to the current benchmark to better reflect the

Fund's asset allocation and investment strategy. Prior to 17 September 2012, the benchmark was 60% of the FBM EMAS Shariah Index and 40% of the 12-month GIA rates of commercial banks; and prior to 17 November 2008, the benchmark was 65% of the FBM EMAS Shariah Index and 35% of the 12-month mudharabah deposit profit rate.

Portfolio Turnover Ratio ("PTR") as at 30 November

	2022	2021	2020
PTR (times)	0.40*	0.48	0.76

* The PTR is lower than the previous financial year due to decrease in trading activities during the period under review.
